**Exercise 6** • Passenger frequency

**Exercise 7** • Long, medium, and short taxi rides

*2* **Data frames**

**Exercise 8** • Net revenue

**Exercise 9** • Tax planning

**Exercise 10** • Adding new products

**Exercise 11** • Bestsellers

**Exercise 12** • Finding outliers

**Exercise 13** • Interpolation

**Exercise 14** • Selective updating

*3* **Importing and exporting data**

**Exercise 15** • Weird taxi rides

**Exercise 16** • Pandemic taxis

**Exercise 17** • Setting column types

**Exercise 18** • passwd to df

**Exercise 19** • Bitcoin values

**Exercise 20** • Big cities

*4* **Indexes**

**Exercise 21** • Parking tickets

**Exercise 22** • State SAT scores

**Exercise 23** • Olympic games

**Exercise 24** • Olympic pivots

*5* **Cleaning data**

**Exercise 25** • Parking cleanup

**Exercise 26** • Celebrity deaths

**Exercise 27** • Titanic interpolation

**Exercise 28** • Inconsistent data

*6* **Grouping, joining, and sorting**

**Exercise 29** • Longest taxi rides

**Exercise 30** • Taxi ride comparison

**Exercise 31** • Tourist spending per country

*7* **Advanced grouping, joining, and sorting**

**Exercise 32** • Multicity temperatures

**Exercise 33** • SAT scores, revisited

**Exercise 34** • Snowy, rainy cities

**Exercise 35** • Wine scores and tourism spending

*8* **Midway project**

**Problem**

**Solution**

*9* **Strings**

**Exercise 36** • Analyzing Alice

**Exercise 37** • Wine words

**Exercise 38** • Programmer salaries

*10* **Dates and times**

**Exercise 39** • Short, medium, and long taxi rides

**Exercise 40** • Writing dates, reading dates

**Exercise 41** • Oil prices

**Exercise 42** • Best tippers

*11* **Visualization**

**Exercise 43** • Cities

**Exercise 44** • Boxplotting weather

**Exercise 45** • Taxi fare breakdown

**Exercise 46** • Cars, oil, and ice cream

**Exercise 47** • Seaborn taxi plots

*12* **Performance**

**Exercise 48** • Categories

**Exercise 49** • Faster reading and writing

**Exercise 50** • “query” and “eval”

*13* **Final project**

**Problem**

**Column names and meanings**

**index**
